Facing the Challenge

2021 Annual Report

Smithsonian Institution Traveling Exhibition Service
Smithsonian Affiliates
VISION:

SITES | Smithsonian Affiliations strengthens connections between the Smithsonian and museums and cultural organizations—and their communities and audiences everywhere—inspiring a deeper understanding of our world and how it can be changed for the better.

Visitors interact on a visit to Destination Moon: The Apollo 11 Mission at the Senator John Heinz History Center, a Smithsonian Affiliate, in Pittsburgh, PA. Courtesy James Kegley, 2019
Every year brings new challenges, but also opportunities.

For the year covered by this report, the challenges are well known: the COVID-19 pandemic; a long overdue focus on racial equality, diversity, and justice; and questions about our future as a cohesive nation.

The Smithsonian Institution Traveling Exhibition Service (SITES) and Smithsonian Affiliations responded with programs and exhibitions on social justice and equity, on the multi-faceted American experience, and on the importance of responsible stewardship of the planet.

The pandemic changed the cultural landscape, making it even more important for the Smithsonian to deepen its collaboration with organizations across the nation. It has driven a marked transformation in the use of digital formats to tell our stories, and it has exposed the interdependencies of the country’s cultural sector, drawing our organizations closer together to share our strengths.

SITES | Smithsonian Affiliations works with organizations and their communities to ask questions that underlie the foundations of our country: What does it mean to be an American? What core values do we share? How do we forge a consensus that can lead to a better future? How do we sustain our planet?

As the chair of the Advisory Board of SITES | Smithsonian Affiliations, I was greatly encouraged by our work in 2021 on these key opportunities, as well as by the generous support for this work. The Affiliations program received its largest gift ever, added four new members, and SITES launched an exhibition and community engagement program, The Bias Inside Us, that garnered both one of the largest gifts and the largest number of donors in its history. These are signs that the work we are doing matters.

Thank you to our director for her vision and leadership and the dedicated, inspirational, and innovative staff who rapidly changed our operating model to adjust for pandemic-related changes in communities around the country.

I would also like to thank the members of the SITES | Smithsonian Affiliations Advisory Board, who so thoughtfully advised the organization—ranging from the development of the strategic plan, recruiting new enthusiastic board members, and serving on exhibit-based fundraising committees. All board members made a meaningful donation this year to fund projects that supported SITES | Smithsonian Affiliations’ mission.

On behalf of the board, I extend a heartfelt thank you to all of the museums and cultural institutions around the country for helping expand the impact of the Smithsonian across the nation. I look forward to continuing to work together so that next year we have even more to celebrate.

Brenda J. Gaines

Board Chair
MISSION:

SITES | Smithsonian Affiliations catalyzes public engagement and sparks curiosity and learning by connecting the knowledge, resources, and expertise of the Smithsonian with a vital network of cultural and educational organizations.
Welcome to our fiscal year 2021 annual report.

It is a pleasure to share highlights of the work you helped make possible. The Smithsonian Institution Traveling Exhibition Service (SITES) and Smithsonian Affiliations achieved noteworthy milestones in fiscal year 2021: debuting several new exhibitions, welcoming four new Affiliates, implementing a nationwide museum-based internship program, and launching a five-year strategic plan.

Our new strategic plan brings together two mature Smithsonian units: the traveling exhibition service, SITES, which includes the Museum on Main Street program, and Smithsonian Affiliations, which forges long-term relationships with a network of cultural organizations. The plan will help us strengthen our network of museums, libraries, universities, and cultural organizations, reaching millions of people through educational programs, traveling exhibitions, shared scholarship, and community engagement initiatives.

Of course, the fiscal year brought unique challenges. The COVID-19 pandemic continued to impact our entire field and required us to work in innovative ways, developing new programs while remaining flexible. The Negro Motorist Green Book exhibition debuted at an Affiliate, the National Civil Rights Museum, while The Bias Inside Us opened at the Science Museum of Minnesota. We successfully introduced a new nationwide internship program that connected 75 college students with 25 Affiliates backed by the Smithsonian’s resources. And the Museum on Main Street program saw continued success in bringing exhibitions that tell a national story and serve as a platform for local stories to small towns and communities across the country.

We are grateful for the partnerships with Smithsonian museums and research centers whose staff and scholars gave presentations to Affiliate audiences, fostered networks of collaboration, and provided expertise in support of classroom learning. We are also indebted to the many colleagues who, with us, developed, curated, and advised on traveling exhibitions around scholarship from the Smithsonian and from national collaborators.

We are also deeply appreciative of our advisory board members whose insightful engagement helps us work better. Last but not least, we thank and salute each of our generous donors whose gifts fuel so much of the work we were able to do this year; without your support, none of this would be possible.

Thank you, and I look forward to working with you in 2022!

Myriam Springuel

Director
2021 HIGHLIGHTS

Affiliations National Conference
The conference examined a series of timely questions about the challenges of a global pandemic, racial injustice, political differences, and how we can collaborate with Affiliates to ensure greater reach and impact.

EXPLORE SITES POSTERS

The Negro Motorist Green Book
A new exhibition and website looks at the harsh reality of travel for African Americans in mid-century America and how the annual guide offered them a way to travel with dignity, while serving as an indispensable tool for the nation's rising African American businesses.
50 States/50 Stories: Historic Highlights

SITES | Smithsonian Affiliations marked the Smithsonian’s 175th anniversary with the launch of 50 States/50 Stories online interactive. The website explores our work throughout our history with collaborators to expand the reach and impact of the Smithsonian, sharing knowledge, resources, and expertise with people everywhere.

EXPLOR THE INTERACTIVE

![Image of a map of the United States with icons representing each state's story]

**MASSACHUSETTS**
In 2013, Native artists at the Plimoth Patuxent Museum, a Smithsonian Affiliate, worked with the Affiliations program to put a spotlight on Wampanoag culture by donating a traditionally crafted white pine canoe, or **mishoon** to The National Museum of the American Indian.

**NEVADA**
In 2005, The Museum on Main Street exhibition *Between Fences* traveled to Yerington, Nevada, in the aftermath of the September 11, 2001, attacks. The Lyon County Library united people for conversations in the community around the exhibition. The result was “The Freedom Fence,” comprised of 700 brightly colored bandanas tied to a barbed wire fence along a local highway.

**HAWAI‘I**
In 2017, with the coordination of Smithsonian Affiliations, National Museum of American History curator of music Dr. John Troutman traveled more than 4,700 miles to bring his latest research about the Hawaiian steel guitar to the Lyman Museum and the Kona Historical Society in Kealakekua, both Smithsonian Affiliates.

The Bias Inside Us

Major support for *The Bias Inside Us* is provided by the Otto Bremer Trust and is based on an original concept developed by Tolerance in Motion. The full list of supporters may be found on the project website.
Originally slated to open in June 2020, the opening was continually pushed back while venues remained closed.

At last, on March 2, 2021, with many health and safety measures in place, the Science Museum of Minnesota opened their doors and launched the four-year, 40-city tour of *The Bias Inside Us*. Nearly five years in the making, the project raises awareness about the social science and psychology of implicit bias, the impact of this bias, and what people can do about it. It builds on SITES | Smithsonian Affiliations’ long-standing commitment to inspire a deeper understanding of our world and how it can be changed for the better.

Visitors to the exhibition explore the foundational blocks of bias, the psychology of how it forms and how it influences behaviors both consciously and unconsciously. Interactive elements display how implicit and explicit bias show up in the world and how bias shapes systems and policies that have consequences for many people and communities.

But the exhibition is just one piece; it serves as a centerpiece for local programming and activities developed by the hosting organizations. Examples include:

- **The National Czech & Slovak Museum & Library**, a Smithsonian Affiliate in Cedar Rapids, partnered with students to create a *Bias Inside Us* mural.

- At the **Schaumburg Township District Library** in Illinois, a virtual lecture by Spanish photographer Angélica Dass focused on her Humanæ project (included in the exhibition) and her pursuit to document humanity’s true colors rather than the untrue white, red, black, and yellow associated with race.

- **St. Cloud State University** designed a program for high school and college students and community members that included visits to the exhibition, to the campus’ visualization lab to look at bias in science and technology, and to the School of Health and Human Services to engage in a conversation about how bias affects health care.

- SITES partnered with Dr. Tessa Charlesworth from Harvard University, our implicit bias content expert, to develop a robust virtual exhibition.

The exhibition is affirming, empathic, colorful, hands-on, welcoming, nurturing and inspiring... Why not make it a day of wellness and enrichment as you do yourself a favor visiting this exhibition?

– Patrick Muller, in *The Gazette* [Cedar Rapids, IA], 3 May 2021, Opinion.
75 Interns Join Innovative Internship with Smithsonian Affiliates
In summer 2021, Smithsonian Affiliations, along with 25 Affiliates, collaborated with Emerson Collective to reinvent its internship program.

Designed as an entirely virtual experience, the Smithsonian Affiliate Digital Learning and Engagement Internship removed the barriers of physical residency and associated costs that can deter students from being able to participate in internships.

Making the internship possible was the collaboration with 25 Smithsonian Affiliates in communities spanning from Connecticut to Alaska. Each Affiliate collaborator was matched with a team of three students to address one of five topics: women’s history, race and social justice, the changing American narrative, climate change, and COVID-19 vaccine education.

Throughout the internship, the Smithsonian was the connector between the 75 interns, the Affiliate organization, and Emerson Collective, providing access to experts, conversations with Smithsonian leadership, and enrichment opportunities. In addition to generously funding this project, the Emerson Collective also provided programming opportunities that helped facilitate conversations between interns and leaders in areas such as education, immigration, and racial justice. And Affiliate organizations provided meetings and enrichment activities to expand the students’ knowledge of the impact museums have on local communities.

Students worked with Affiliate organizations to produce educational modules, or collections, on the Smithsonian Learning Lab platform, an interactive website sharing educational content with learners of all ages. The collections made Affiliate resources that otherwise may not have been available digitally accessible to a wider audience to connect with exhibitions, programs, and educational material. All student collections are published and searchable on the Learning Lab platform for educators and students using the hashtag #SAinterns. Learning Lab projects are highlighted on the Smithsonian Affiliations website and provide access to all student collections.

“I feel so lucky to have been selected to be a part of the Smithsonian Digital Internship program. I am especially grateful for the many inspiring speakers, conversations, and enrichment opportunities we all had this summer. My summer experiences have been incredibly eye opening, and I know they will continue to influence my future endeavors and career path as I move forward.”

– Lucy Peterson, intern, Mid-America Science Museum, Hot Springs, AR
Exhibitions and Collaborations Help Utah #ThinkWater
Utah Humanities, a long-time collaborator with the Museum on Main Street program, utilized back-to-back tours of Water/Ways and H2O Today as the core of a statewide initiative, Think Water Utah, to focus attention on Utah’s complex and diverse water story. Vast arid areas that get little rainfall are bounded by mountain ranges that wring large amounts of snow from weather systems. European American approaches on water use and access have sometimes been at odds with deep traditions in American Indian communities.

Think Water Utah quickly became a water programming tour de force, with Utah Humanities forging partnerships with multiple partners to create real public impact.

- The Utah Museum of Fine Arts created a companion community-based art exhibition and educational programs that could be used all over the state.
- The Natural History Museum of Utah also developed a water-themed exhibition helping to expand the reach of the initiative to Salt Lake City.
- Utah Humanities worked with public radio stations to showcase a new water story each week, airing 56 episodes five times weekly, and joined MoMS’ Stories: YES program to enhance work with local youth.
- Utah Humanities and its partners developed projects that included interviews with area scientists and ecologists, explored the diversity of viewpoints on water usage and access, and used art to connect Utahns with their water stories.

- West Valley City Arts created educational modules on water.
- Water/Ways hosts participated in training sessions that enhanced their professional capacity and strengthened their local companion water-themed exhibitions.
- H2O Today sites worked with Utah Humanities to develop companion content.
- Utah Humanities and its partners developed projects that included interviews with area scientists and ecologists, explored the diversity of viewpoints on water usage and access, and used art to connect Utahns with their water stories.

SITES’ H2O Today and MoMS’ Water/Ways exhibitions prompt deep engagement and create powerful impacts. Both exhibitions challenge visitors to think about every impact water has on them and their communities.
Pivoting in a Pandemic

Facing the challenges born out of the dual pandemics of COVID-19 and racism, we are inspired by the resiliency of our collaborating organizations, communities, and Affiliates.

Men of Change: Taking it to the Streets

With a closed facility due to COVID-19, the Smithsonian’s Anacostia Community Museum worked with SITES to reinterpret and redesign the exhibition *Men of Change* to be presented outside. Placed on the city sidewalks around the Ron Brown High School and the Deanwood Recreation Center in Northeast Washington, D.C., *Men of Change: Taking it to the Streets* was an opportunity to experience the Smithsonian in the neighborhood. Through multiple standalone and fence displays on the campus, it profiled significant African American men who are powerful icons in the country’s historical and cultural landscape. A section added to the original seven-part show allowed the students and community to designate and honor local men of change. The exhibition’s impact was further augmented by pop-up projections of photos on buildings in other areas of the city, and a series of targeted virtual programs with the school and Deanwood community.

An audio experience featuring the voices of Deanwood community members and Ron Brown High School students describes the achievements of some of our country’s most inspiring Black men.
MoMS Program Starter Videos and Video Exhibition Tours

Like most museums and cultural organizations, Museum on Main Street hosts suffered significant impacts from closures and restrictions brought on by the COVID-19 pandemic. MoMS’ staff and its partners at the state and local level worked hard and creatively to keep exhibitions open to the public as much as possible. Flexibility was the name of the game! MoMS created a series of “program starter” videos that hosts could use to enhance virtual programs. Host communities transitioned quickly to digital engagement by creating online tours of their Smithsonian and local exhibitions. In Summerville, Georgia, Crossroads: Change in Rural America had been open just one week when facilities all over the state closed. To help the community enjoy and think about the content they could not visit, state partner Georgia Humanities brought in a film crew to record a video tour that not only introduced Crossroads, but also highlighted local exhibitions and recognized the work of local partners.

Smithsonian Affiliations/Earth Optimism

The Smithsonian has been partnering with Affiliates to address climate change, working with youth to develop project-based action plans tailored to their communities. Smithsonian Affiliations and the Smithsonian’s Conservation Commons teamed up to ask students to share their ideas for addressing the environmental concerns we all face. Aligning with the United Nations’ Sustainable Development Goals, their innovative solutions come from around the country, and provide fresh insight into problem solving for their communities—in their homes, schools, and hometowns. As part of the Smithsonian’s Earth Optimism initiative, these students, working with mentors at Smithsonian Affiliate organizations, created two-minute videos to present ideas that can be replicated and scaled, and present a sense of hope in the dialogue around conservation and sustainability.
